

M250

DECT base station

This device is designed for professional use with: **M53, M55, M56, M58**. Any other use is considered unintended use. Please read these precautions and the instructions on setting up and using the product thoroughly before using the device. Save this document and do not give the device to third parties without it. Safety instructions (GPSR)

- **Note:** The nameplate is located at the bottom or rear of the product.
-  **Warning:** If the phone is not supplied with power via the Ethernet cable, use only the following recommended power adapter:
 - Power adapter:¹ 5 V, 2 A
 - Manufacturer: MassPower → EU & UK: Model NBS0E050200UV (Snom P/N 00004570)Other power supplies may damage or even destroy the device. Power adaptors shall be installed near the equipment and shall be easily accessible.
- Avoid placing the device's cord where people may trip over it. Avoid placing the cord where it may be exposed to mechanical pressure as this may damage it. If the power supply cord or the plug is damaged, disconnect the device and contact qualified service personnel.
- Mount the device only at heights not exceeding 2 m.
- The device is for indoor installation only. **Not for outdoor installation!**
- The operational temperature is between 0 °C to +40 °C, humidity not exceeding 95 % and non-condensing.
- Do not install the device in surroundings at risk for explosions (paint shops, for example). Do not use the device if you smell gas or other potentially explosive fumes.
- Do not install the device in rooms with high humidity (for example, in bathrooms, laundry rooms, damp basements). Do not immerse the device in water and do not spill or pour liquids of any kind onto or into the device.
- If the product comes in contact with any liquids, unplug any line or power cord immediately. Do not plug the product back in until it has dried thoroughly.
- Medical devices might be adversely affected. Please consider the technical ramifications when installing the devices in a doctor's office, for example.
- Recommended MINIMUM distance to the device: 100 cm.

¹ Not included in delivery

Additional safety information

- **Operating environment** Remember to follow any special regulations in force in any area, and always switch off your device when its use is prohibited or when it may cause interference or danger. Use the device only in its normal operating positions. Do not place credit cards or other magnetic storage media near the device, because information stored on them may be erased.
- **Medical devices** Operation of any equipment emitting radio frequency signals may interfere with the functionality of inadequately shielded medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external radio frequency (RF) energy or if you have any other questions concerning this topic. Switch off your device in health care facilities when signs posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.
- **If you have an implanted pacemaker** Do not use if you have an implanted pacemaker unless the pacemaker manufacturer's directions expressly permit the use of devices emitting pulsating radio frequency signals.
- **Implanted medical devices** Manufacturers of medical devices recommend that a minimum distance should be maintained between a wireless device and an implanted medical device, such as pacemakers or cardioverter defibrillators, to avoid potential interference with the medical device. Persons who have such devices should:
 - Always keep the wireless device more than 20 cm from the medical device when the wireless

device is turned on.

- Do not carry the device in a breast pocket.
- Turn the wireless device off immediately if there is any reason to suspect that interference is taking place.
- Read and follow the directions of the medical device's manufacturer.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

- **Small children** Your device and its enhancements may contain small parts. Keep them out of the reach of small children.
- **SELV (Safety Extra Low Voltage) Compliance** Safety status of input/output connections comply with SELV requirements.
- **Potentially explosive environments** Switch off your device when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Switch off the device at refuelling points such as near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage, and distribution areas; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas, and areas where the air contains chemicals or particles such as grain dust or metal powders.

- **Sensitive Electronic Equipment** The current state of research concludes that operational DECT devices normally do not adversely affect electronic equipment. Nevertheless, you should take some precautions if you want to operate DECT devices in the immediate vicinity of such equipment like sensitive laboratory equipment. Always keep a minimum distance of 10 cm to the equipment even when the devices is in standby.
- **RF Exposure Statement: Caution:** To maintain the compliance with the RF exposure requirement, the DECT base shall be installed and used such that parts of user's body other than hands are maintained at a distance of 20 cm or more.
- **Electrical Surges** We recommend the installment of an AC surge arrester in the AC outlet to which this device is connected to avoid damage to the equipment caused by local strikes of lightning or other electrical surges.
- **Privacy of cordless telephone calls** Wireless telephone calls are transmitted by radio waves, so there is a possibility that your conversations could be intercepted by radio receiving equipment within range. For this reason, you should not think of wireless conversations as being as private as those on corded telephones.
- **Potential TV interference** Some wireless devices operate at frequencies that may cause interference to TVs and VCRs. To minimize or prevent such interference, do not place the device near or on top of a TV or VCR. If interference is experienced, moving the wireless device farther away from the TV or VCR will often reduce or eliminate the interference.

Technical specifications

DECT

- Frequency range
 - Europe: 1,881.792 - 1,897.344 MHz
- RF transmission power
 - Europe: < 24 dBm

Scan the QR code to access the following online document: [data sheet M250](#). There you will find a complete overview of all technical data.

Standards conformance

CE This device complies with the essential health, safety, and environmental requirements of all relevant European directives. This device complies with the Radio Equipment Regulations 2017 and the essential health, safety, and environmental requirements of all relevant UK legislation.

Unauthorised opening, changing, or modifying the device will cause the warranty to lapse and may result in the loss of conformity CE/UKCA . [You can download the declaration of conformity at https://www.snom.com/conformity.](https://www.snom.com/conformity)

Cleaning

Use an anti-static cloth. Please avoid water and liquid or solid cleaning products as they might damage the surface or internal electronics of the product.

Disposal

Base station | Power adapter: This device is subject to European Directive 2012/19/EU and may not be disposed of with general household garbage. If you do not know where to dispose the device at the end of its lifespan, contact your municipality, local waste management provider, or vendor.

Disposal of electrical and electronic products in countries outside the European Union should be done in line with local regulations. Please contact local authorities for further information.
